

CHATOYER ENVIRONMENTAL FLEXIBLE FLOOR BUNDING TOOLKIT

protecting the
environment

SPILMAX® PRODUCTS CATER FOR YOUR DAY TO DAY CLEAN UP NEEDS, AS WELL AS FOR THE CONTAINMENT AND CLEAN UP OF MOST EMERGENCY SITUATIONS.

Flexible Floor Bunding is an ideal way to create secure bunded areas in workshops, liquid storage areas and across warehouse doorways to contain any spills. The bunding is manufactured from high density foam encased in high frequency welded heavy-duty PVC. The 75mm high triangular profile collapses down as vehicles drive over it and springs back to shape after it passes. It is secured to the ground using 50mm wide x 4mm thick Duragal flat bar, countersunk dyna-bolts and Maxi-bond adhesive. Full instructions are included to ensure the units are easily installed and can be removed and re-installed if required.

INSTALLATION INSTRUCTIONS:

- Pre-drill duragal flat-bar, counter sunk 8mm hole to suit masonry fasteners approx every 400mm.
- Mark out area to be installed with chalk line.
- Lay Flexible bund along chalk line with overlay on top with one edge lined up.
- Lay duragal flat-bar along that edge; drill into concrete insert masonry fasteners.
- Lift other edge and apply maxi bond adhesive under flexible bund and seal.
- Pull over lay to take the shape of flexible bund; Lay duragal flat-bar along edge; drill into concrete insert masonry fasteners.
- Corner pieces to overlap flexible bund and glued with PVC Glue.

| CODE | DESCRIPTION | DIMENSIONS |
