

CHATOYER ENVIRONMENTAL BOOM & BAFFLE TOOLKIT

protecting the
environment

SPILMAX® PRODUCTS CATER FOR YOUR DAY TO DAY CLEAN UP NEEDS, AS WELL AS FOR THE CONTAINMENT AND CLEAN UP OF MOST EMERGENCY SITUATIONS.

The SpillMax® range of boom and baffle systems provide general purpose and specific purpose containment booms and baffles designed to:

- Contain and control marine spills
- Manage floating noxious weeds
- Control floating debris on inland water ways
- Control the flow of liquid in a dam or lagoon

General Purpose Buoyancy Containment Boom

- A light weight, flexible oil boom easy for small response crews to deploy, retrieve and store.
- The high buoyancy to weight ratio of this boom makes it ideal for use in choppy waters
- Polyethylene foam floats are internally secured to eliminate the migration of the boom and providing a low drag profile to improve containment efficiency
- Buoyancy booms are a low cost alternative for permanent boom applications

General Purpose Fence Containment Boom

- A light weight, easily managed containment barrier ideal for operations in coastal ports, harbours and inland water ways
- Can be quickly deployed without the use of blowers or other powered equipment
- Configured for easy transport and storage
- Fence Containment Booms are often included in spill response trailers located on inland water ways

Sea Silt Fences

- Configured as a fence type containment boom with skirt
- Used to contain sediment and particle debris in the top 900mm—1,800mm of the water column
- This boom stores more conveniently than conventional sediment curtains
- Used by wharf repair, demolition and construction operations
- A compactly stored and quick response boom

Our systems are developed and constructed for:

- rapid deployment
- ease of cleaning
- optimal storage configurations
- efficient transport.
