

SpilMax[®] Absorbents

The SpilMax[®] a range of absorbent products all absorb spilt liquids effectively but the range can be used in different ways.

Pads

- A fast and easy way to absorb and contain liquid
- Placed on top of the spill and soak up majority of liquid
- Made of polypropylene or fully organic material
- Can be put under machinery if small leaks occur, or on drums to absorb and contain drips from pumps and hoses
- 1 pad absorbs greater than 1.0 litres per saturation

Mini Booms

- Made of polypropylene or fully organic material
- Use mini booms to circle or bund leaking machinery or drums where a mixture of oils and water is present
- Contains and absorb a small amount of liquid (up to 25 litres)
- Available in lengths from 1.2m to 3m.

Pillows

- An effective tool for containing liquids from leaking machinery
- Quickly absorb spilt liquids preventing further clean up
- Made of polypropylene to ensure a long life span

Wipes

- Made of poly and vistex
- Used to clean up small spills and wipe down tools and equipment after spills
- A general purpose wipe
- Useful in the maintenance of machinery and tools
- Can be used on drum tops to absorb and collect drips

Oil Only absorbent products are designed to absorb oils and fuels and repel water making them ideal for use near and on water.

Universal absorbents are developed to absorb oil, fuels, coolants, general workplace chemicals and common agricultural chemicals.
