

WEIGHTED DRAIN COVER

Weighted Drain Covers provide a simple yet effective method for temporarily sealing a drain pit in the event of a spill. Designed as an economical solution for your stormwater management, the Weighted Drain Cover comes with a storage bag that can be attached to a wall or similar to ensure it is readily available to deploy in seconds.

APPLICATIONS

- Industrial sites
- Vehicle car parks
- Fuel storage & transfer areas
- Aggregate wash down areas

STANDARD FEATURES

Made with a robust PVC construction, the fabric underlay gives the Weighted Drain Cover a better seal on rough surfaces. The gel filling allows flexibility so the drain cover conforms to almost any gutter or flooring surface while allowing the edges to sit firmly over the grate and drain surrounds

- 900gsm PVC
- 260gsm non woven geotextile underlay
- Gel filled perimeter
- Carrying handles x 4
